STATEMENT REGARDING NON-PARTY CREDITORS

Clear Channel Communications, Inc. ("CCC") is party to a credit agreement with several senior lenders that includes negative covenants restricting CCC's actions on certain matters relating to finances. These covenants are of the type customarily found in broadcast industry credit agreements.

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"). CCBL proposes to acquire WAAM(AM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Call Sign	City of License	Facilities
WAAM(AM)	Ann Arbor, MI	1600 kHz, 5 kW, U, DA2
WXDX(AM)	Dearborn, MI	1310 kHz, 5 kW, U, DA2
WDFN(AM)	Detroit, MI	1130 kHz, 50 kW, U, DA2
WTKA(AM)	Ann Arbor, MI	1050 kHz, 10 kW, U, DA2
WYBN(AM)	Saline, MI	1290 kHz, 0.5 kW, U, DAD
WNIC(FM)	Dearborn, MI	Channel 262B, 32 kW, 183 m
WMXD(FM)	Detroit, MI	Channel 222B, 45 kW, 146 m
WLLC(FM)	Detroit, MI	Channel 294B, 61 kW, 155 m
WJLB(FM)	Detroit, MI	Channel 250B, 50 kW, 149 m
WKQI(FM)	Detroit, MI	Channel 238B, 100 kW, 131 m
WQKL(FM)	Ann Arbor, MI	Channel 296A, 3 kW, 88 m
WWWW(FM)	Ann Arbor, MI	Channel 275B, 49 kW, 152 m

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.¹

There are no other principal community coverage contours controlled or proposed to be controlled by CCBL that overlap or intersect the proposed acquisition of WAAM(AM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the commonly owned stations. The predicted principal contours of WAAM(AM), WXDX(AM), WDFN(AM), WTKA(AM), WYBN(AM), WNIC(FM), WMXD(FM), WLLC(FM), WJLB(FM), WKQI(FM), WQKL(FM) and WWWW(FM) are shown in Figure 1 herein. There are five "radio markets" for analysis under the Commission's Rules.

Market 1 is defined by the principal community contours of WAAM(AM), WDFN(AM), WTKA(AM), WYBN(AM), WQKL(FM) and WWWW(FM).

Market 2 is defined by the principal community contours of WAAM(AM), WDFN(AM), WTKA(AM), WKQI(FM), WQKL(FM) and WWWW(FM).

Market 3 is defined by the principal community contours of WAAM(AM), WXDX(AM), WDFN(AM), WTKA(AM), WNIC(FM), WKQI(FM) and WWWW(FM).

¹ See Section 73.3555 of the FCC Rules.

Market 4 is defined by the principal community contours of WAAM(AM), WDXD(AM), WDFN(AM), WTKA(AM), WNIC(FM), WLLC(FM), WJLB(FM) and WKQI(FM).

Market 5 is defined by the principal community contours of WAAM(AM), WDXD(AM), WDFN(AM), WNIC(FM), WMXD(FM), WLLC(FM), WJLB(FM) and WKQI(FM).

Count of Stations in Defined Markets

The number of radio stations in each "radio market" is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

In Markets 1 through 5, there are at least 63 radio stations (31 FM and 32 AM), including the subject co-owned stations, that intersect or overlap each "radio market." Since WDFN(AM) is in all of the markets, the count of 63 stations were determined by the principal community coverage contour of WDFN(AM).

Figure 2 is the tabulation of the radio stations identified in each of the defined radio markets. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.
